

# Stretch Wing Chair Instructions

## It's as easy as 7 Steps to a SURE FIT

- 1 LOCATE.....**  
the sewn-in "Center Front" and "Center Back" labels. Also look for the positioning stickers on the left and right arms.

- 2 PLACE** .....  
the slipcover over the chair using the sewn-in labels. Line up the back hem even with the floor, and make certain the ties are evenly spaced at the back corners.

- 3 LINE UP SHOULDER.....**  
seam across the top of the chair's back. Next, line up the vertical seam of the slipcover's wings to match the chair's seams. Tuck excess fabric into the crevices of the wings.

- 4 CENTER FRONT**  
of furniture cover and position the T-cushion dart seams in the seat area over the corners of the cushion.

- 5 KEEP SEAMS ALIGNED.....**  
over the T-cushion, lifting the seat cushion and tucking the fabric of the slipcover under the seat cushion. Tuck any excess seat and wing arm fabric under the seat cushion and into the crevices.

- 6 WRAP ELASTIC** .....  
hem under seat and join velcro strips behind each leg to achieve a fitted look.

- 7 WHEN FINISHED**  
your slipcover should fit snugly, almost like it was custom-made. It's "sure" to make a positive impression!

**NOTE:** Wing chair slipcovers only fit styles with T-shaped seat cushions.
